Kenny Berenberg,
G & S Feldman
P.O. Box 1136
Oakhurst, NJ 07755

In response to your request for a percentage of recycled material in Norampac board I Copied the following off of our website.

Because Norampac takes its social and civic responsibilities to heart, it has made respect for the environment a key principle, brought to life with concrete policies. Our boxes are recyclable, they contain a high percentage of recycled fibres, waste cuttings are reused, in our offices and our factories, Norampac recycles everything that can be recycled.

Our environmental ISO accreditations and our substantial investments in researching healthy production methods attest to the seriousness of our ecological principles.

But the company's social commitment does not end there. It is reflected in numerous programs that have a positive impact on society : active participation in charitable organizations, donations to groups that help the disadvantaged, support for various programs aiming to build a just and equitable society.

Respect of environmental resources and a social conscience are two fundamental values of Norampac. As a responsible company, Norampac defends these values, not only when making major business decisions, but also in our everyday actions.

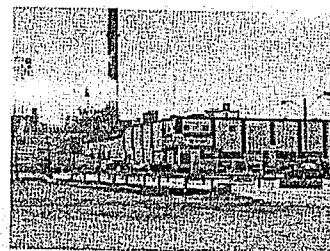

Sincerely,

Edward Finegold
