STEP 7:
Position the stop ring to limit the arm’s range of motion if desired. The marked angle will be in the center of the range of motion.

Step 8:
Insert monitor arm into the mount until release button locks in place.

To remove arm press release button and pull the arm up near the joint.
**STEP 1:**
Remove the plastic front cover.

**STEP 2:**
Remove the two side screws and top screw from the mount and separate the mounting plate from the rest of the mount.

**STEP 3:**
Attach the mounting plate to a wall stud or other structural support using the screws provided. Mounting to drywall alone is not recommended. Use level to ensure that mounting plate is perfectly level.

**STEP 4:**
Align the mount with the mounting plate on the wall.

**STEP 5:**
Reinstall the two side screws and top screw into the mount and tighten.

**STEP 6:**
Reinstall the plastic cover.
