STEP 8: CABLE MANAGEMENT

M/FLEX INSTALLATION HARDWARE

HSIMF0816v2

Hex Key A (2mm)
Hex Key B (2.5mm)
Hex Key C (3mm)
Hex Key D (4mm)

M2 WEIGHT ADJUSTMENT

Your monitor should move up and down evenly and should stay in place once adjusted. If it is difficult to adjust or moves without assistance, it is not properly counterbalanced.

1. Use Hex Key C to loosen the two side screws (C) on the dynamic arm's joints. Then use Hex Key B to loosen the two top screws (B) on the dynamic arm.
2. Tighten the two side screws (C) to achieve the force needed to hold the monitor weight. After tightening the side screws to the desired amount, tighten the two top screws (B) firmly to hold the adjustment.
3. Move the monitor around to ensure that movement is smooth and the arm functions as desired. If required, repeat steps 1 and 2 (in order) to adjust the force as needed.

Note: Do not overtighten the screws as it can damage the screw head or threads.

M8 WEIGHT ADJUSTMENT

(Monitor should not exceed 40 lbs.)

1. Use Hex Key C to adjust the Tension Screw (A) because in the Upper Arm of the M8, turn the Tension Screw clockwise to increase tension for larger, heavier monitors. Turn the Tension Screw counterclockwise to decrease tension for smaller, lighter monitors.
2. If further tension adjustment is required, tension can be fine tuned via the half-filion friction discs (B) located on the side of the M8's Upper Arm.
3. Use Hex Key B to turn the screws on each friction disc clockwise to increase friction, turn each screw counterclockwise to decrease friction. Be sure to apply the same amount of rotation to each screw.

STEP 1: MOUNT POST TO CLAMP MOUNT ASSEMBLY

- Fully tighten screw to post.
- Install Top Cap

Note: Do not mount post to clamp if installing a bolt-through mount.

STEP 2: ATTACH MOUNT TO WORK SURFACE

CLAMP/GROMMET MOUNT

- For installation on open edges of work surface:
  - Snap Mount in (C) against work surface edge and fully tighten Clamp Screw (D).
  - Note: Work surface is too thin to attach. Mount at default setting. Proceed to Step 3.
- Complete Step 1.
- Proceed to Step 3.
- For installation through a grommet hole:
  - Insert Mount (C) against work surface edge and fully tighten Clamp Screw.
  - Insert Mount to that front of Base rests the user. Fully tighten Clamp Screw.
  - Note: If Mount will not fit through grommet hole, proceed to Step 3. Mounting on inside edge of grommet hole.
- Proceed to Step 3.
- For installation on work surface positioned against a wall or panel:
  - Draw the Bottom Clamp (B) from the Top Bracket (D) by loosening Bracket Screws (C) with Hex Key (E).
  - Position Top Bracket against work surface edge.
  - Unthread the work surface, then thread the Top Bracket to the Top Bracket using the Bracket Screws.
  - Note: There are two sets of holes for different surface thicknesses. Use the set of holes that allow the clamp screws to fully tighten.

BOLT-THROUGH MOUNT

- If both bolt mount options were purchased, begin with Step 1 below; otherwise, proceed to Step 3.
- Draw the Bottom Clamp (B) from the Top Bracket (D) by loosening Bracket Screws (C) with Hex Key.
- Drill a hole through work surface in desired location.
  - Note: The Bolt-Through Mount may also be accomplished by a larger drill hole or grommet up to 1" in diameter for cable management (M) with the Arm and through the hole in the underside of the work surface.
- Position the M2/M8 Base over the work surface hole (B).
- Align Bolt-Through Hole (B) and against work surface edge. Position Mount to that front of Base rests the user. Fully tighten Clamp Screw.
- Note: If Mount will not fit through grommet hole, proceed to Step 3. Mounting on inside edge of grommet hole.
- Proceed to Step 3.

STEP 3: CABLE MANAGEMENT AND BRACKET ASSEMBLY

M2 Bracket

- Install Cable Management Clip in desired location.
- Position B1 Bracket with Knob in desired location on Post and turn Knob to securely fasten to Post.
  - Note: Score marks on post are about 1" increments.
- For B3 Bracket installation, remove B2 cap, place B3 bracket on top and install insert screws (B).

STEP 4: ADDITION OF SECOND ROW OF MONITORS

a. Install Cable Management Clip in desired location.

b. Position B1 Bracket with Knob in desired location on Post and turn Knob to securely fasten to Post.
  - Note: Score marks on post are about 1" increments.

d. For B3 Bracket installation, remove B2 cap, place B3 bracket on top and install insert screws (B).

STEP 5: ATTACH ARM TO BRACKET AS NEEDED

M8 Bracket

a. Install Cable Management Clip in desired location.

b. Position B1 Bracket with Knob in desired location on Post and turn Knob to securely fasten to Post.
  - Note: Score marks on post are about 1" increments.

c. When attaching a second monitor use B2 bracket and install pan head screw (A) using 2.5 mm Hex Key.

d. When attaching a third monitor use B3 bracket and install set screws (B) using 2.0 mm Hex Key.

e. Install necessary caps B1/B2 Cap (when B3 not present) or B3 Cap.

STEP 6: ATTACH VESA TO MONITOR WITHOUT SLIDER

- Place VESA Bracket in position on back of monitor with lip (A) toward top of monitor and attach using 4 screws provided. VESA Bracket can accommodate 75 mm or 100 mm hole patterns.
  - For this, you may also use screws that came with your monitor.

b. Snap VESA Bracket (A) into Ball Joint until it clicks.

c. To remove, depress QuickRelease Tab (B) and slide monitor up and away from Arm.

d. If security is required, tighten Security Screw (C) using Hex Key A.

STEP 7: ADJUSTMENTS

a. Fully tighten Clamp Screw (D).

- Proceed to Step 3.

- Note: Clamp Mount cannot be used to mount the M/Flex to any vertical surface.

b. Place VESA Bracket in position on back of monitor with lip (A) toward top of monitor and attach using 4 screws provided. VESA Bracket can accommodate 75 mm or 100 mm hole patterns.
  - For this, you may also use screws that came with your monitor.

b. Snap VESA Bracket (A) into Ball Joint until it clicks.

c. To remove, depress QuickRelease Tab (B) and slide monitor up and away from Arm.

c. If security is required, tighten Security Screw (C) using Hex Key A.
